 The list below gives the prices at which bargains done yesterday by members of the London Stock Exchange were recorded in the Stock Exchange Daily Official List. Members are not obliged to mark bargains except in special cases, and the list cannot, therefore, be regarded as a complete record of

prices at which business was done.

Bargains are recorded in the Official List up to 2.15 p.m. only, but later transactions can be included in the following day's Official List. No indication is available as to whether a

only one bargain in any one security at any one price is recorded.

name of the section. Unless otherwise denoted shares are £1 fully paid and stock £100 fully paid. Stock Exchange securities

adversely affect Tobacco shares. Despite good results from the industry earlier in the year, the F.T.-Actuaries share index for the section is some 10 per cent. below its July year's peak. Currently, it is just under 25 per cent. up since January 1 compared with a rise of over 34 per cent. in the parent Consumer Goods (Non-Dursble) Group.

## ACTIVE STOCKS

The above list of active stocks is based on the number of bargains and three-month "Call" rates ecorded yesterday in the Official list and under Rule 163(1)(e) and eproduced today in Stock Exchange dealings.

# Slowdown goes on in wholesale prices

BY DAVID WALKER

The official index of the gyer age prices of home sales of manu-factured goods stand at 139.4 (1963 = 100) in September, only 0.1 point up on the previous month's figure, but still 7.7 per cent. higher than the 129.4 figure of a year carlier.

The index is not seasonally adjusted, and monthly movements can frequently be miolanding. Nonetheless, the continued fall in the rate of advance is consistent with the theory that there was a rapid restoration of profit margins in tha first half of the year. It could also be seen as reflecting, in part, the preliminary effects of the Confederation of British Industry initiative on price rise limitation, which begon at the end of July.

Between July and August, the index bad moved up by 0.3 points,

THE SLOWDOWN in the rate of while the previous monthly periad THE SLOWDOWN in the rate of while the previous monday period increase in U.K. wholesale prices saw a 1 point advance, apparent since June continued. The fall in the materials cost between August and September, index mounted to 1 per cent, at according to pravisional figures 132.5, against 133.8 in August, issued vestarday by the Department of Trade and Industry.

The slowdown in the rate of while the previous monday periods have a 1 point advance.

The fall in the materials cost index mounted to 1 per cent, against 133.8 in August, 100, had seen a 1 per cent, dachine on the previous month.

This further deceleration coincided with the second successive
monthly drop in the cost of basic
materials and fuel used by manufacturing industry fallowing the
steady advance between February
end July.

The official index of the core.

# The great capital spending conundrum

BY C. GORDON TETHER

bave played a part in producing the hig slow-down in investment activity which the Prime Minister slogled out as the most unsatis factory feature of the current economic scenc in his television interview this week. What is much more open to question is whether Ministers are justified once the present phase of the Great Dehate ends with the October 28 vote in the Commons. we can expect an instant change in the attitude of the business community to new investment a

begin with, the great majority of husiness people—up to 90 per cent, according to the pinion polls-bave heen seeing participation in the Common Market as a foregone conclusion for a lone time past. So there are onviously grounds for wondering whether doubts about Brilish entry, as such, have responsible to the extent Whitehall seems to think for the husiness system's lack of enthu-siasm for new investment in

## Other causes

At the same time, it has to he recognised that. If such unmenna, things are not necessarily worker during that period. going to improve dramatically in the more immediate future. After all. Mr. Wilson has now pro-

mark, such as it is, is destined to remain with us even if the Green said this way and Hunter Green ment sets the chairman of the Swan Hunter

hut from entirely different con-

# A close watch

Since there has been so much talk of the importance of British industry being quick off the mark in exploiting the advantages of an enlarged EEC market, most of the larger hustness concerns will have been keeping a particularly close watch on the EEC economic watch on the EEC economic scene in recent months. Accordingly, they could not have failed to out warships from Industria.

South Africa's a put this quality they could not have failed to out warships from Britain. If In a sense, the news from Soaln put this quality and the could relieve the County warships from Industria. ingly, they could not have failed to ootlee that growth has been faltering in nearly all the member countries of late and that all the indications are that a period of considerable uncertainty lies ahead for the Comminity as a whole.

In such circumstances, many of them may well have decided

Spain instead of from Britain. If so, it would relieve the Govern-does not come as a surprise, since in the last six months South African military evaluation teams have visited a number of European countries, including Britain.

According to reports from pean countries, including Britain in the last six months South African military evaluation teams have visited a number of European countries. Including Britain in the last six months South African military evaluation teams have visited a number of European countries. Including Britain is seek suitable replacements for many older vessels.

into the Community oust lead to a hig overall expansion in their markets. Naturally, if they have a substantial margin of spare capacity already—as many companies now have—they are particularly likely to have reached this conclusion.

There is also the important prints are convinced that even where British firms are convinced that even where British firms are convinced that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, that they will need more capacity, the transport of the State ships. The need that they so that the South African Government, was phelicopters would be reimposed. The helicopter contract has need that the Government that the Government that the Government that the Government that the Government that the Government that the South African Government was phelicopters would be reimposed. The helicopter contract has never they so placing orders with Britain is too great with three-incb guns and antist the political risk of placing orders with Britain is too great with three-incb guns and antist the political risk of placing orders with Britain is too great with three-incb guns and antist the political risk of placing orders with Britain is too great with three-incb guns and antist the political risk of placing orders with Britain is too great with three-incb guns and antist the political risk of placing orders with Britain is too great with three-incb guns and antist the political risk of placing orders with Britain is too great with great the political risk of placing orders with Britain is too great which would almost certainly be convicted with would almost certainly be the political risk of placing or

that they will need more capacit; they may not necessarily be thinking in terms of locating the required investment in the U.K.

## Confused

A great deal has been heard in the Great Debate of the ten-dency for industry located in major economic conglomerations
